Ride/Safety Director  
Kevin & LeAnn Griggs

Well believe it or not it is 2023! That sounds so futuristic to a kid that grew up in the 60's/70's. If I could travel back and speak to myself in say 1972. I would have been thinking our motorcycles will be hovering a foot or two off the ground, had power cells that never ran out of energy and a beautiful girl sitting on the back with her arms locked around me by 2023. I would have been right on the last part but way off on the flying around on endless energy part.

I hope you all had a wonderful Christmas and New Year holiday. I am betting not many of you were still riding your bikes during the Christmas week deep freeze. Brrrr Cold! If you are still riding during the winter months when it's not – 30 degrees, then the following five tips are for your consideration during winter riding.

### ***Wear the Right Gear***

Just like summer riding, you need to not only dress for a fall from your bike but also to keep you warm during the ride. Riding while you are cold and uncomfortable makes you more susceptible to an accident from the distraction of being uncomfortable. So, dress in layers and cover all exposed skin from the wind. Heated gear is heaven sent. Use your heated seats and hand grips if your bike has them.

### ***Motorcycle Prep***

If you plan to do winter riding, you should try to equip your bike to make the ride more comfortable. A wind-shield and wind wings help to redirect the cold air around your body. The heated grips and seats help your body to maintain body temperature. If your bike is water-cooled, make sure your antifreeze is fresh and effective.

### ***Check Your Tires***

Now you may be saying to yourself, Kevin, tires should fall under #2. You wouldn't be wrong, but tires are so important. It deserves its own category. Especially for winter riding. Cold weather makes your tire pressure drop. So, check your tire pressure. Be mindful of your tread wear. Just a brief stop at an intersection can cool your tires and make them less sticky as they are when they are warm.

### ***Salt on the Road***

The cold air and salt on the winter roads make your tire traction less effective. Watch for a crystalized appearance on the road. Salt can be as dangerous as ice. It will also rust out your bike, so give it a good wash when you get home.

### ***If it Snows its Time to Get Home***

If you are out and it starts snowing, you need to get home. If you are too far away from home, go to a safe place and wait until conditions improve. Snow on the road can make traction treacherous, even in a car with 4 wheels and more surface contact to the road.

Beginning 2023 with a great meal  
with our friends!! Doesn't get any  
better than this!

From your editor

The newsletter will be changing under our new association, Eagle Wings Motorcycle Association. I am open to all your suggestions. What you would like to see in the shortened letter? Anyone, I mean anyone, can send me pictures, a story, a joke, a recipe for the letter.

The ride schedule will be in the *December, January and February editions only*. Be sure to print it out and put it on your fridge or into your phone calendar so you don't miss a thing next year!

Kevin G will still be putting out ride/event alerts at least twice a month. So be sure to watch your emails.

The website, [ohiochapterf.com](http://ohiochapterf.com), will continue under EWMA. Please use this tool to attract all others, with any type of motorcycle or no motorcycle at all!

Here is a QR code to use for the EWMA application. This streamlines the application process and you can even pay through the code.

Thank you, Becky
